

## High Plains Raceway RV and Carport Rental Policies

### RV Facilities

- RV spots have electricity ONLY; there are no water or sewer connections.
- Each "single" RV spot measures 22' x 40'.
- The spots are oriented back-to-back so you may "pull through" and use two spaces (22' x 80') for an extra charge. If your rig is longer than 40' you must reserve a "pull through".
- We have (20) spots with 30 amp service (10 "pull through"). Each of these spots has access to (1) 30A RV outlet and ½ of a 20A duplex outlet.
- We have (6) spots with 50 amp service (3 "pull through"). Each of these spots has access to (1) 50A RV outlet.
- Please refer to the [Paddock Map](#) to see how the RV spots are laid out.

### Carport Facilities

- Carport spots have electricity and shade ONLY; there are no water or sewer connections.
- Each shaded carport stall is 15' wide and 20' deep with a smooth concrete floor and an 8' ceiling height. There are no sidewalls or dividing walls on the carport structure.
- Each carport stall includes a 15' x 60' reserved parking area immediately to the north of the stall. Stalls #1 and #16 have the option of parking on the ends of the carports, allowing parking for rigs longer than 60'.
- Each carport stall includes an RV pedestal that houses (1) 20A duplex receptacle and (1) RV receptacle (either 30A or 50A).
- Please note that the RV pedestal is located approximately 3' inside the north edge of the stall at the locations indicated by the red/black dots on the paddock map, please insure your RV has sufficient electrical cord to reach the pedestal once you have backed your rig up to your carport stall.
- There are (14) 30 amp stalls available (#2 - #15).
- There are (2) 50 amp stalls available (#1 and #16).
- Please refer to the [Paddock Map](#) to see how the carports are oriented.

### Terms

- Overnight use/occupancy must be prearranged and the overnight gate attendant fee paid for either by the host club or any individual RV/Carport spot renter. MOST of the time the weekend host club pays the fee for the gate attendant on Friday and Saturday nights. **Please consult the [RV calendar](#) online to confirm that overnight use is available on the night you plan to stay**
- If arrangements have been made for overnight use a "day" is defined as from the time the track goes cold (usually 5:00pm) on one day until when the track goes cold the next day. If a club is hosting a single day event, the RV/Carport spot is only available the night before the event, not the night following the event.
- If there are no arrangements for overnight use a "day" is defined as from when the gates open until the time the track goes cold.
- A "weekend" is defined as from the time the gates open Friday morning until the track goes cold Sunday afternoon. If the host club is paying for overnight access for the Thursday night prior to an event, the "weekend" fee includes Thursday night.
